

Company Overview

Founded in 2012, VPSBlocks specializes in delivering technologically advanced cloud services tailored to meet the diverse needs of small to medium-sized enterprises (SMEs). Our hosting solutions leverage cutting-edge infrastructure, typically reserved for multi-million-dollar websites, and make it accessible through our versatile VPS Cloud environment.

As one of Australia's leading VPS hosting providers, VPSBlocks prides itself on offering quality and affordable solutions that prioritize both technical performance and exceptional customer service. Our premium VPS products are designed for businesses requiring greater control and flexibility than shared or basic hosting options. With VPSBlocks, clients can choose their preferred operating system, allocate 100% of system resources, and scale as needed without the expense of hardware ownership.

Our customer-managed VPS solutions provide full server control, allowing businesses to adapt seamlessly as their needs evolve – all at a truly competitive price.

World-Class Datacenter

When partnering with VPSBlocks, you're choosing an organization that collaborates with world-leading companies to provide secure and reliable web-based services. Our infrastructure is hosted in a Melbourne-based facility operated by 5GN, one of Australia's most prominent datacenter providers.

5GN operates has over 50 data centres housing over 1,500 racks, ensuring state-of-the-art infrastructure for thousands of servers. Their extensive fiber network, high-speed connectivity, and peering with more than 900 ISPs deliver exceptional performance across metro, national, and international locations.

What VPSBlocks Offers

VPSBlocks provides tailored solutions in Web Hosting, Application Hosting, & Private Cloud services to meet your business needs, whether you're hosting critical systems, applications, or websites.

Our Services Include:

Web Hosting

Flexible options of Linux or Windows based servers with cPanel or Plesk hosting control panels, ideal for hosting multiple websites or essential business applications.

Application Servers

Purpose-built for hosting email services, VPNs, virtual desktops, and other business-critical applications.

Private Cloud Solutions

Customized private cloud setups with internal networking support, offering dedicated resources and enhanced security for enterprises.

Managed Backups

Reliable on-site and off-site server backup solutions to protect your data and ensure disaster recovery readiness.

Spam Filtering

Advanced spam filtering services to maintain secure and efficient email communications.

Server Management

Comprehensive server management, including installation, updates, troubleshooting, and optimization for operating systems and applications.

What Sets Us Apart

High-Performance Storage

100% NVMe/Flash RAID 10 storage for unmatched speed and reliability.

Self-Healing Failover

Automatic hardware failure detection and recovery for continuous service availability.

Dedicated Resources

Guaranteed CPU and RAM allocations for predictable performance.

Scalability

Adjust CPU, RAM, and storage resources effortlessly in our flexible cloud environment.

Comprehensive Control Panel

Intuitive tools for quick deployment, monitoring, and server management

Australian-Based Support

Local infrastructure and responsive support provide low-latency connections and personalized assistance.

DDoS Protection

Robust defense against malicious attacks ensures uninterrupted service.

Software Partners

At VPSBlocks, we understand that robust hosting requires the best tools and technologies. That's why we partner with industry-leading software providers to deliver seamless, high-performance, and reliable solutions for your business. Our collaboration with trusted software partners ensures our customers have access to the latest technologies and capabilities.

Our Key Software Partners Include:

cPanel & Plesk

Industry-leading hosting control panels offering intuitive interfaces and comprehensive tools for website and server management, tailored for both Linux and Windows environments.

Microsoft

Leveraging Microsoft technologies, including Windows Server, for businesses that require a robust, secure, and scalable hosting environment.

CloudLinux

Enhancing server stability, density, and security by isolating each customer's environment and optimizing resource usage.

Softaculous

A comprehensive security suite for proactive server protection, safeguarding against malware, brute force attacks, and vulnerabilities.

Let's Encrypt & DigiCert

DigiCert provides premium SSL/TLS certificates with enterprise-grade security, while Let's Encrypt offers free, automated certificates for accessible website encryption.

SpamExperts

Advanced email filtering solutions that protect businesses from spam, phishing, and other email-borne threats.

R1Soft

A comprehensive security suite for proactive server protection, safeguarding against malware, brute force attacks, and vulnerabilities.

Imunify360

A comprehensive security suite for proactive server protection, safeguarding against malware, brute force attacks, and vulnerabilities.

FreeBSD

VPSBlocks proudly supports FreeBSD, a robust, open-source operating system renowned for its advanced networking, security features, and performance.

With its reputation for reliability, FreeBSD is a preferred choice for critical systems, and VPSBlocks ensures it's seamlessly integrated into our infrastructure to meet the needs of our technically advanced clients.

Hardware Partners

At VPSBlocks, we rely on trusted, world-class hardware partners to deliver the performance, reliability, and security our customers expect.

Our partnerships with these renowned hardware brands empower us to provide unmatched hosting solutions that cater to businesses of all sizes. From powerful processors to robust networking and cybersecurity solutions, our hardware partners form the backbone of our exceptional service offerings.

Supermicro

Renowned for its cutting-edge server technology, Supermicro delivers high-performance, energy-efficient solutions that power our advanced hosting infrastructure.

Fortinet

Providing industry-leading cybersecurity solutions, Fortinet ensures our network is protected with robust firewalls and comprehensive threat management systems.

AMD

With state-of-the-art processors, AMD powers our hosting platforms, offering unmatched performance, scalability, and energy efficiency for diverse workloads.

Intel

Leveraging Intel's reliable and innovative CPUs, we ensure consistent and powerful computing capabilities for all our hosting solutions.

Cisco

A global leader in networking technology, Cisco provides our infrastructure with high-speed connectivity, reliable routing, and advanced network security solutions.

Why These Partnerships Matter

By collaborating with the best software and hardware providers in the industry, VPSBlocks ensures our clients benefit from powerful tools, cutting-edge technology, and security-enhanced platforms. Whether you're hosting a simple website or managing a complex enterprise application, our partnerships with trusted brands guarantee a reliable, secure, and high-performance hosting experience.

At VPSBlocks, we're committed to delivering reliable, secure, and high-performance hosting solutions tailored to your business needs. Join the hundreds of satisfied customers who trust us to power their success.

What Clients Say About Our Service

Excellent service, support and team behind VPS Blocks. Highly recommend as a quality, hands-on hosting service.

- M Soden

Very professional organisation, easy to contact even on public holidays. Have used them for a VPS for a number of years without a hiccup.

- Tyson B.

I have such good experience with them. I've had my VPS server for a few years and never experienced any issues. The support team is also helpful. I can't recommend them enough, I would give them 10 stars.

- L Bikowski

I've been really impressed since I moved across to VPSBlocks web hosting. They helped me with setup and have provided responsive ongoing support. They optimised my server configuration for me and have been fantastic in providing a seamless migration from my old host. I definitely recommend them to anyone looking for VPS hosting.

- Joshua Phares

Been using the VPS blocks service for more than 7 years for a small business size and its always a great experience on support, reliability, quick response on questions or needed changes Using the services overseas and always good connectivity and speed. Would recommend VPS blocks for users.

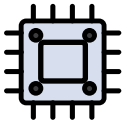

- Peter

The direct access and live chat for support has been excellent. Would like to say that it is a reliable web host in Australia. I've also registered 3 .com.au domains. They have easy-to-use control panel, great features and easy as heck to setup. Speed is good, and the price is really cool. All in all, a very good experience with Vpsblocks hosting. Top provider in Australia for getting VPS plans at nice rates. Recommended.

- Tom Man

Why Choose VPSBlocks?

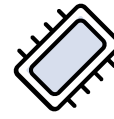

100% NVMe/Flash RAID 10 Storage

Experience lightning-fast speeds and superior reliability for all your applications.

Self-Healing Failover Systems

Automatic detection and recovery from hardware issues ensure continuous uptime.

Guaranteed Dedicated Resources

Dedicated CPU and RAM allocations for consistent and predictable performance.

Local Australian Support
